

My idea for change:

The boat house which is used by YSJSU Boat Club is not fit for purpose anymore and has very poor hygiene standards.

After huge investments into facilities such as Haxby Road, the Boat Club deserves some attention as it is in the centre of town and representing the University

How should this change?

The University should look into refurbishing the facilities or offer alternative options for the Boat Club

What should the SU do?

Senate mandates that the President of the Students' Union supports the Boat Club and encourages the University to move the refurbishment of the facility higher up their list of priorities.
