

**My idea for change:**

All Presidents should work with Disability Advisors and the University to host forums and support sessions where Disabled Student can attend and voice their concerns around accessibility and other issues at the University.

**How should this change?**

The Presidents should implement the forums as well as researching and implementing how the Students' Union and its events can be made more accessible.

**What should the SU do?**

Host a regular forum to enable a line of communication between Disabled students and the Union/University.
